## **OLYMPIC HISTORY**

The Olympic Games have a long history which goes back to ancient times, starting in Greece 3,000 years ago. Sports competitions were organized at Olympia and were named after their location, hence their name of *Olympic Games*.

Olympic athletes had to be male, of Greek nationality, and not slaves. They promised to compete in an honourable way and to follow the rules but some athletes still cheated. If caught, they had to pay a large fine and this money was used to pay for statues of Zeus, which were located along the route to the stadium with the name of cheat on each base. To get to the stadium, the athletes had to walk past all the statues.

Unlike the modern Olympics, which currently include 35 sports and nearly 400 events, many of which are team sports such as football and basketball, the ancient Games only included individual events. Seven types of events took place in the stadium, including running, discus, javelin, long jump, wrestling, and boxing. There was also chariot racing and horse riding in the hippodrome.

The Olympic Games became a major sports event but the Roman Emperor Theodosius I finally decided to ban the Olympic Games in 393 AD after more than 1,000 years of existence because he thought they were a pagan cult.

Gradually, the site disappeared and was forgotten. However, in the 19<sup>th</sup> century, archaeological work finally revealed the ruins of Olympia and, today, visitors can appreciate Olympia and imagine the past glory of the Games.
